

Bowen Therapy Conference 2018

Expanding Knowledge: Shaping Professional Practice

TITO PIGNETTI

Transform your Feet, Transform your Life

Tito will outline the biodynamics and architecture of the foot and its influence on body structure, function and performance. He will discuss, motivate and provoke a different way to look at the body in a way you may not have even thought possible.

He will show you how a proper functioning foot will do much more than take away your pain. It can transform your life!

This enthralling presentation will revolutionise the way you look at the body and how you practice.
